

# Come join us for a **SUMMER INTERNSHIP** in **PLANT GENOMICS!**

## PLANT GENOMICS @ Michigan State University

**APPLICATION DEADLINE:** February 8, 2021

**PROGRAM DATES:** May 24 – July 30, 2021

**PARTICIPANT SUPPORT:** \$5,750 stipend. Housing and travel provided for an in person program.

**ELIGIBILITY:** You must be a US citizen or permanent resident, enrolled in a degree granting college/ university and be entering your Sophomore, Junior, or Senior year in fall 2021.

### **What is Plant Genomics @MSU?**

A 10-week mentored research experience utilizing wet-lab or computational-based approaches to address fundamental questions related to the biology of plants or photosynthetic micro-organisms.

### **Why Michigan State University?**

MSU is a world leader in plant sciences, with more than 150 faculty engaged in research, teaching, and outreach with access to excellent research facilities.

### **Develop your scientific skills**

Plants are fundamental to life on earth. Plant research at MSU addresses issues of sustainability associated with the health and nutrition of an increasing population against a backdrop of limited natural resources and climate change. Whether you're an experienced undergraduate researcher or a student who is looking for their first research opportunity, we have projects that are at the forefront of plant research that will enable you to develop your scientific skills and knowledge.

### **Get a jump-start for your career**

The REU program offers research seminars, professional development workshops, networking opportunities, graduate school advice, career discussions, presentation opportunities, and social activities. Join us in Michigan for summer 2021!!!
